QA Engineer (Manual & Automation)

Profile

Versatile QA Engineer with over 10 years of experience in both manual and automated testing. Skilled in designing test strategies, executing functional and exploratory tests, and developing automation for UI, API, backend, and performance validations. Adept at working in Agile environments and collaborating with cross-functional teams to ensure timely and high-quality software releases. Passionate about quality, efficiency, and continuous improvement.

Professional Experience

- QA Engineer (Manual & Automation) - VWFS (Sep 2023 – Present)
 - Designed and executed functional test cases in Xray, achieving full coverage of business requirements.
 - Automated UI scenarios using TestCafe with TypeScript, improving execution time and regression coverage.
 - Performed manual exploratory testing for edge cases and unexpected behaviors.
 - Validated API endpoints using Insomnia and backend logic with Jest.
 - Conducted performance testing using K6 (TypeScript-based).
 - Actively participated in Agile Scrum rituals and contributed to sprint deliverables.
- Data QA Engineer - DIGITAL@FEMSA (Feb 2022 – Sep 2023)
 - Led manual and automated testing of data quality pipelines using SQL, AWS, and GCP tools.
 - Created test cases and automated validation rules using Great Expectations and AWS Glue DataBrew.
 - Executed UI and backend test scripts using TypeScript and Jest.
 - Collaborated with development and product teams to enforce data quality across systems.
- QA Analyst - OpenGov by Terminal (Dec 2019 – Feb 2022)
 - Conducted functional and regression testing manually and via Ghost Inspector
 - Identified automation opportunities in repetitive UI flows.
 - Supported transition from manual to automated test processes.
 - Delivered concise defect reports and supported UAT efforts.

- QA Engineer (SDET) - HCL / AMDOCS / HP (Jun 2014 – Dec 2019)
 - Designed and executed both manual and automated test cases for complex systems.
 - Built data-driven and keyword-driven frameworks using Java, Selenium, and Maven.
 - Participated in continuous integration pipelines and defect triaging meetings.
 - Performed regression, smoke, and sanity tests pre- and post-release.
- Manual QA & Test Lead Roles - Alcatel / IBM / INTEL / BOA-TCS / Apptio / Dextra / Lazlo (2007 – 2014)
 - Developed and executed manual test plans for functional, integration, and UAT phases.
 - Created basic automation scripts for web testing using Selenium RC.
 - Participated in sprint planning, retrospectives, and defect resolution workflows.
 - Led junior testers and managed manual regression cycles.

Technical Skills

- Manual Testing: Functional, exploratory, regression, UAT
- Automation Tools: TestCafe, Playwright, Selenium, Jest, K6
- Languages: TypeScript, Java
- API Testing: Insomnia
- CI/CD: Concourse
- Data Validation: SQL, Great Expectations, AWS Glue DataBrew
- Test Management: Jira, Xray, TestRail, HP ALM

Education

Bachelor's Degree in Computer Science
 University of Guadalajara
 2003 – 2007

Core Strengths

- End-to-end testing expertise
- Fast adaptation to new tools and environments
- Strong debugging and defect analysis
- Clear communication across technical and non-technical teams
- Emphasis on scalable and maintainable QA processes
